Corrective Action Response required no later than: N/A					
Supplier Management Name: Brack Hudson			LM Surveyor Name: Geri Fitzpatrick		

NOTES

Activities Witnessed/Observed on the Floor: A very personal touch to all work performed there. The management is very aware of all processing that is performed. They do perform a large variety of part marking. All areas are well organized. Documentation is readily available for personnel to review. The paperwork I observed was all in order. In receiving inspection, they organize their incoming jobs and attach all required specifications, travelers and inspection forms. Production areas are clean and free of debris.

Additional Objective Information - To Further Understand the Supplier's Capabilities/limitations:

United Metal Marking produces a large variety of marking types, over 25. These include Impression Stamping, Electrochemical Etching, Laser Etching, Engraving, Silk-screening and Ink Marking. The Lockheed Martin surveyor was allowed complete facility access and personnel support for this activity. The Universal Metal Marking management is to be commended for their courtesy, cooperation, responsiveness and professionalism. The positive attitude ensured the successful accomplishment of the survey goals and was greatly appreciated.

Note: This survey is based on a sampling of survey elements. An approval status of this survey does not constitute a waiver of any inspections, tests, or other requirements of the purchase order or written contract, nor does it guarantee acceptance of the articles produced.
